A: And at night?

B: Oh, my new dog \_\_\_\_\_ (keep) me awake all night!

**G**

Read the article. Then check (✓) the correct answers. (4 POINTS)

Renzo Piano was born in Genoa, Italy, in 1937. Renzo was born into a family of builders, including his grandfather, father, several uncles, and his brother. He graduated from Milan Polytechnic Architecture School in 1964, and then he taught architecture there. In 1969, he was awarded his first important project. He designed the Italian Industry Pavilion for Expo '70 in Osaka, Japan. An English architect named Richard Rogers saw the pavilion and liked Renzo's work. Richard suggested that they work together and enter an international competition to create a design for the Georges Pompidou Center in Paris. They won the competition.

Since then, Renzo Piano has designed many world-famous buildings and landmarks. In 1982, he was chosen by an art collector to design the Menil Collection in Houston, Texas. Not only is this museum large enough to hold more than 10,000 works of primitive and modern art, it was also designed to be a center for music, literature, theater, and cultural educational activities. Recently, he was commissioned to design an airport in Osaka, Japan. Because there is very little open space available in Osaka, an artificial island was built in the bay to hold the airport. Kansai International Airport Terminal is the largest building Piano has ever designed. It can handle up to 100,000 passengers a day.

- Renzo Piano studied architecture in
  - Osaka, Japan.
  - Paris, France.
  - Milan, Italy.
- In 1969, Renzo Piano
  - graduated from Milan Polytechnic Architecture School.
  - designed an airport.
  - designed a pavilion.
- Renzo Piano was asked to design a building by
  - an English teacher.
  - an American art collector.
  - a Japanese pilot.
- Renzo Piano's largest building is
  - a large museum.
  - a French building.
  - an airport.
